"You Can Achieve if you believe!"

Educating Parents for better communication with youth

Our first parent meeting of the year was a great success. Attendance was excellent and we had a positive and enthusiastic discussion on the topic of Effective Communications.

Family participation in the clubhouse program is vital in order to support the youth so they can achieve good academic standing at school, avoid problems with DJJ, reduce or permanently eliminate substance abuse and make healthy choices in their lives. Like in the past years, every month we will have educational activities for parents so that counselors, clubhouse staff and other families can come together as a team and learn how to help and support our youth.

WHAT'S BEEN GOING ON AT THE CLUBHOUSE?

HIV GROUP

- Tarynn Moore, an HIV prevention youth educator with Positive Impact has been speaking with our youth about this important topic. The HIV epidemic is a serious public health issue in the Latino community. In 2009, Latinos accounted for 20% (9,400) of new HIV infections while representing approximately 16% of the total US population. The HIV infection rate among Latinos in 2009 was nearly three times as high as that of whites (26.4 vs 9.1 per 100,000 population).

HEALTH CENTERS

DR3AM'RS RADIO STATION

- Jerry Rupert, our broadcasting instructor has been working hard with our DR3AM'RS teaching them how to create commercials and training their vocal cords. At the same time some of our clubhouse members have been working on recording some songs written by them.!
